

**F**ORGED IRON  
HARDWARE  
*by* MCKINNEY

*RESIDENCE of Mr. Howard C. McCrady, William Penn Highway, Pittsburgh, Pa. Theodore Eichholz, Architect, Pittsburgh. The appearance of this beautiful entrance is enhanced by the use of MCKINNEY Forged Iron Hardware—Warwick design.*

WHEN the world was not nearly as old as it is today and living was not nearly as complicated, individual craftsmanship was the accepted standard. In those unhurried times, home furnishings were painstakingly made by hand. Paintings and decorations were executed by masters, and hardware was forged in metal by honored artisans who gloried in their craft.

Hinge straps, beautiful handle sets, knockers, shutter dogs and pieces innumerable were designed in keeping with the best contemporary art. The iron forged by the masters of the Italian Renaissance rivalled in beauty the precious metal work of that celebrated silversmith, Benvenuto Cellini, while the hardware of the Early American Period revealed a rugged simplicity characteristic of the Period.

Today, McKinney has recreated in Forged

*This Heart design handle is finished in Relieved Iron, sometimes referred to as Swedish Iron. The photograph gives a suggestion of its beauty. This finish which has been likened to that seen on famous museum pieces, has called forth enthusiastic comment from all quarters.*

Iron six of the most beautiful designs of olden times. They are the Heart, Curley Lock, Tulip, Etruscan, Warwick and Alhambra. The patterns were selected because of their authenticity, their beauty and their adaptability to modern building requirements. It is no longer necessary to have Forged Iron especially made to order—or pay the prices which such work makes necessary. McKinney has made pieces of every essential character readily available at your Builders' Hardware Merchants. All are accurately gauged for application and priced well within the range of the modest home owner.

Those who rebel against the commonplace, who love the sincerity of old-fashioned things, will find real pleasure in studying the examples of McKinney Forged Iron shown on the following pages.

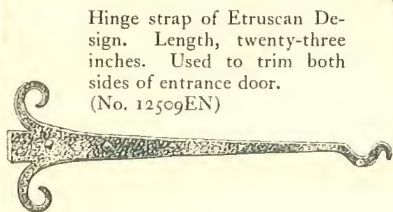

**C**ATCHING the true spirit of mediaeval workmanship, the Etruscan Design, evolved from the finest examples of Latin craftsmanship, holds a subtle invitation for such a setting as is shown here. Spanish or Italian architectural motifs are peculiarly fitted to this ruggedly graceful design.

Etruscan entrance handle set. The handle is nine and three-quarter inches long. Latches of the same design are available for interior doors. (No. 12500EN)

The door knocker to the left for use with Etruscan Design is seven and three-quarter inches long and three and one-half inches wide. (No. 12641)

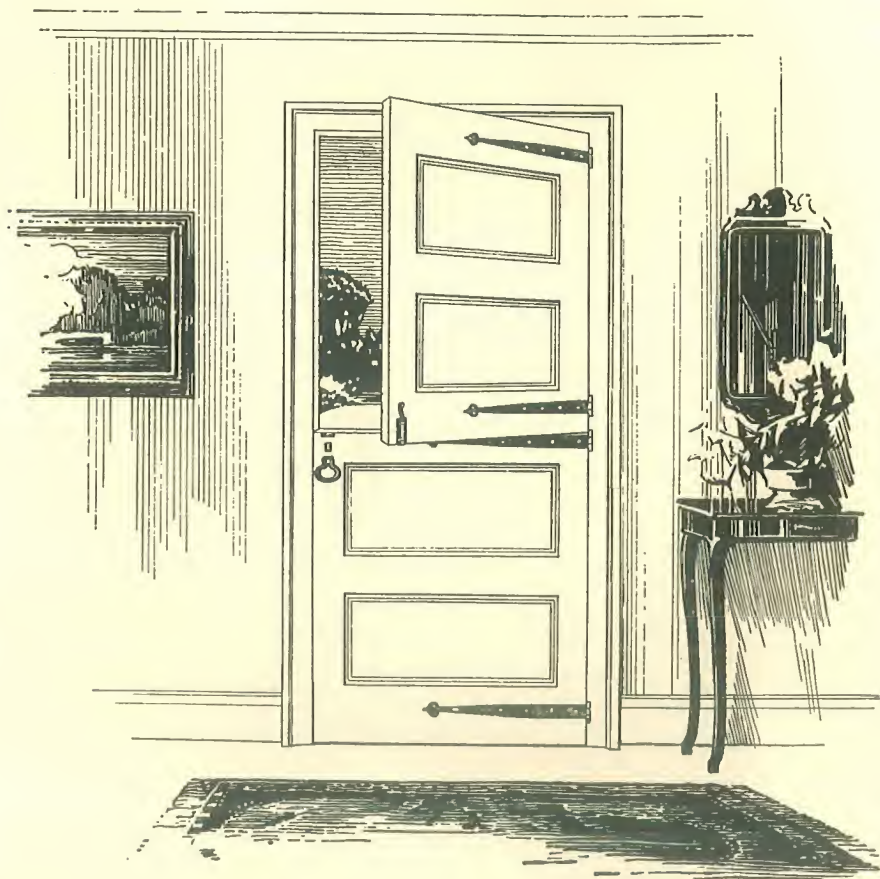

Hinge strap of Etruscan Design. Length, twenty-three inches. Used to trim both sides of entrance door. (No. 12509EN)

This turn knob and drop ring handle of Etruscan Design are for use on the interior side of entrance doors; also on French Doors and others. (Nos. 12520EN & 12524EN)

FROM Colonial times comes the inspiration for the Heart Design. Correct treatment of a Dutch Split Entrance Door is illustrated, and the friendly drop ring handle is at its best against a background so appropriate. A house may be outfitted with the McKinney Heart Design from ground to roof.

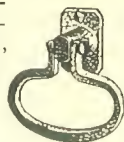

The surface bolt which locks the split door into one unit. Length, four and one-half inches. (No. 12630)

Turn knob for throwing dead bolt. (No. 12620)

The drop ring handle most appropriate for the Dutch Split Door. Its extreme width is four inches; length, three and one-quarter. (No. 12300)

Hinge strap of Heart Design. Twenty-two and one-quarter inches long. (No. 12509HT)

IN some modern homes you will see a curious medley of hand forged hinges and noticeably modern handle sets. Such inconsistency is to be avoided. This V-groove batten door, set off with three hinge straps and forged iron entrance handle in the Tulip Design illustrates an accepted treatment. It is altogether charming.

Entrance handle set of Tulip Design. The length of the handle is twelve inches. Door pulls of the same design are available. (No. 12501TP)

Hinge strap of Tulip Design. Two sizes are used on the type of entrance shown. Lengths, nineteen and one-half inches and twenty-three inches. (No. 12509TP)

Turn knob placed above the drop ring handle to operate dead bolt. (No. 12524EN)

This attractive Door Knob has a diameter of two inches and a rosette two and three-eighths inches wide. (No. 12533)

A Door Knocker in perfect keeping with any period trim. Six and one-half inches long and three and one-half inches wide. (No. 12642)

# CURLEY LOCK DESIGN

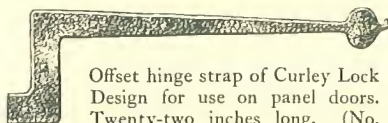

**H**ANDLE set and hinge straps in the Curley Lock Design and the gracefully scrolled knocker furnish the accenting notes for this Colonial paneled door. In point of workmanship and authentic feeling nothing finer is available than these and the several other Curley Lock pieces for use throughout the entire house.

This door knocker harmonizes with the several designs. It is eight and one-half inches long and three and one-half inches wide. (No. 12640)

Entrance handle set of Curley Lock Design. The handle is ten and three-quarter inches long. (No. 12500CL)

Offset hinge strap of Curley Lock Design for use on panel doors. Twenty-two inches long. (No. 12511CL)

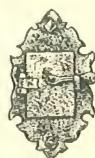

THE Warwick Pattern shown on this page typifies the best traditions of the Elizabethan Period. The exquisite scroll work of this old English design is ideally suited to the ductile character of the metal from which it is made. It may be used with excellent effect to enhance the beauty of the present-day home of modified English architecture.

Showing a detailed view of the Warwick Pattern Entrance latch handle. The Escutcheon is seventeen inches long, the Grip being five and three-quarter inches from center to center. (No. 12569 WK)

This Peep-hole Knocker is reminiscent of the days when to *see* the visitor before opening the door was more than a formality. It is very appropriate for such a door as is shown here. (No. 12648 WK)

**A**LHAMBRA—the latest addition to the McKinney Forged Iron group—is the richest and most intricately designed. The delicate tracery of this pattern reflects the Moorish influence of ancient Granada. McKinney now offers this beautiful Alhambra design for complete home equipment—even the door studs are obtainable to carry out the desired effect.

This Alhambra Drop Ring Handle has an Escutcheon trim carrying out the spirit of the hinge strap design. The Escutcheon is fifteen inches in length. (No. 12594AA)

Another Drop Ring Handle in the Alhambra design, surmounted with a cylinder lock and suitable rosette. Outside Diameter of the ring, four inches. (Nos. 12686AA and 12500½AA)

Even so utilitarian an article as a foot scraper may still be given grace and attractiveness. (No. 13011)

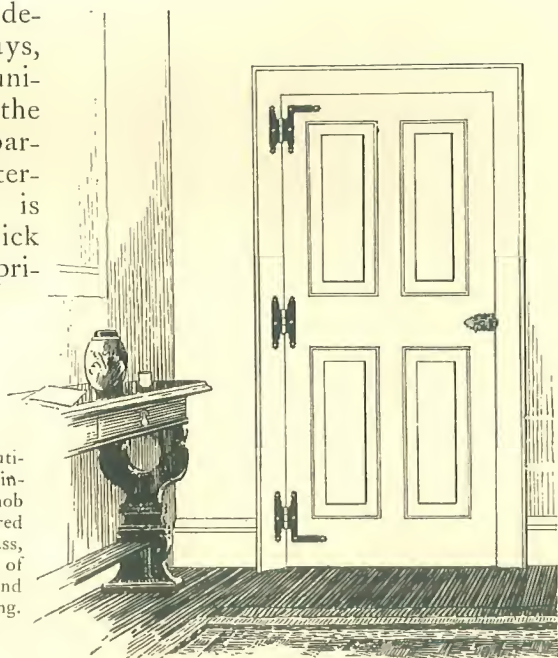

## INTERIOR DOORS . FRENCH DOORS

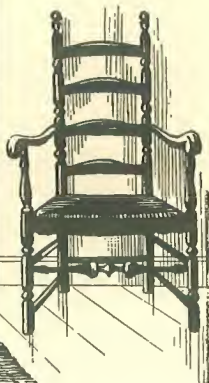

AMONG all hinge designs of earlier days, none has been more universally admired than the H & L hinge. It is particularly fitting on interior doors. Here it is shown in the Warwick design with an appropriate thumb latch.

A close-up of a beautiful Door Knob for interior doors. The knob is of hand hammered English Antique brass, the escutcheon of forged iron, six and one-half inches long. (No. 12593 WK)

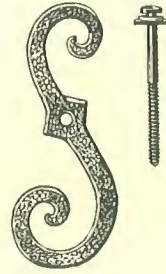

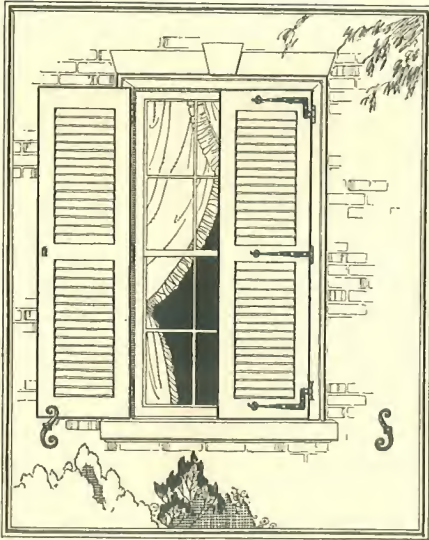

THESE French Doors are strikingly enhanced by the use of H & L hinge plates. Lever handles and key plates provide the natural completing touch. This type of door is becoming increasingly appreciated. How important to be certain that it shall be fittingly carried in every detail.

# S H U T T E R S

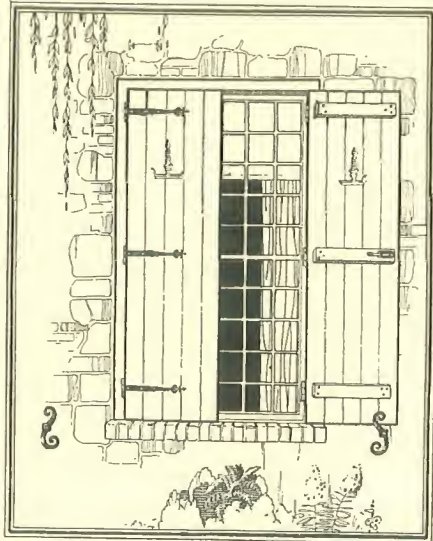

A graceful S-design shutter dog eight inches in length. (No. 12810)

This Surface Bolt gives safe, sane protection. The bolt is four and one-half inches long. (No. 12630)

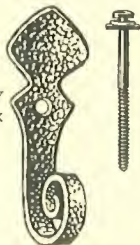

IN the McKinney Forged Iron Hardware you will find all the pieces essential to the complete outfitting of your home—from the entrance door to the garage gate. Among these pieces, particular emphasis should be placed on shutter hardware. McKinney Forged Iron Shutter equipment includes straight and curved hinges, hinge straps, surface bolts and shutter dogs.

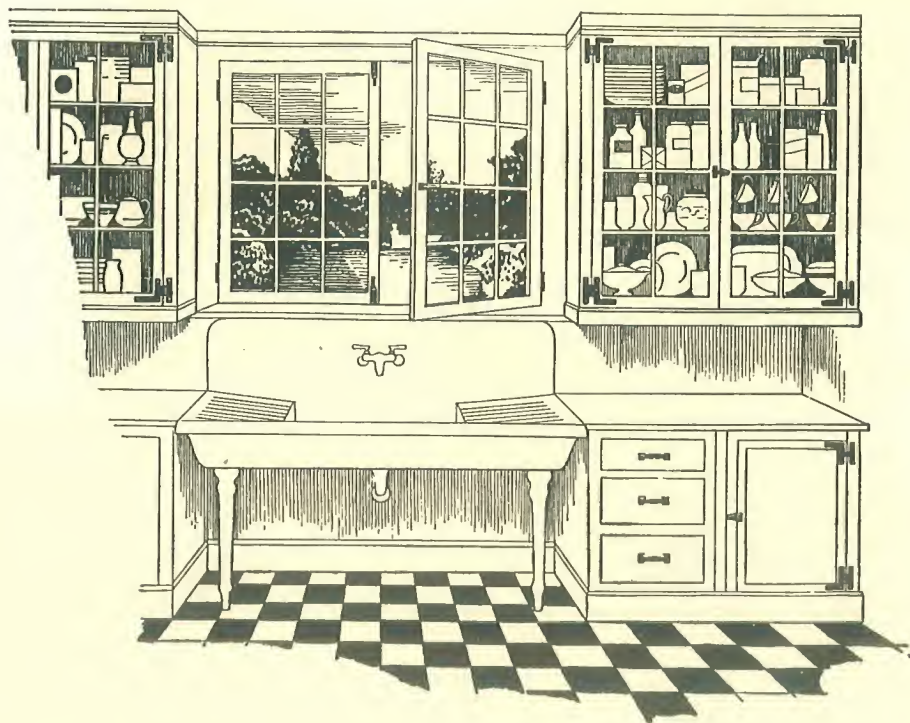

FORGED Iron trim has been designed to cover both louvre and batten shutters. Of course the offset strap is used for louvre shutters as shown in the upper illustration, the straight strap being confined to the center panel. Hinge straps are available in six designs, Warwick, Heart, Curley Lock, Tulip, Etruscan and Alhambra. They are approximately fourteen inches long.

Another Shutter Dog, widely used in former days. It is six inches long. (No. 12820)

# C A B I N E T F O R G E D I R O N

THE completeness of McKinney Forged Iron Hardware as to pieces is indicated by their use to outfit fully this entire kitchen group. Cabinet latches, drawer pulls, surface bolts, casement fasteners and hinge plates are utilized. For the sake of beauty and consistency such decorative pieces may be used throughout the house. In addition to their individual beauty these artistic pieces permit a consistency delightful to the heart of the most critical.

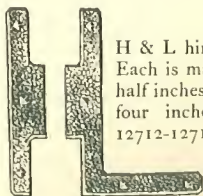

Drawer Pull, used with all designs.  
It is five inches long. (No. 12736)

This cabinet knob may be used instead of cabinet latches if preferred. (No. 12740)

Cabinet Latch, with strike, appropriate for all designs. Length, two inches; Width, one and one-half inches. (No. 12732AA)

H & L hinge plates for use on cabinets. Each is made in two sizes: four and one-half inches and six inches long; three and four inches wide respectively. (Nos. 12712-12710)

# FORGED IRON LANTERNS *by* McKINNEY

THE WAYFARER

THE WICKET

THE SALEM

THE NIGHTWATCH

THE BELFRY

THE CLOISTER

The Brass Mail Box shown above is finished in English Antique Brass finish, requiring no polishing. It is of the same dimensions as the Mail Box on the right (No. 12696)

OVER the entrance doorway in pairs on either side or as interior fixtures, these McKinney lanterns of forged iron impart a very real touch of genuineness and hospitality.

The lanterns are given a special rust-resisting process on a base of pure Armco Ingot Iron, recognized as inherently rust-resisting. Then a further protection is given with a beautiful soft Duco finish. No expense has been spared to make each lantern a source of permanent pleasure—yet all has been done within a price range remarkable for economy. Furnished with a bracket for wall application or a chain and canopy for ceiling installation.

McKINNEY MANUFACTURING CO.  
PITTSBURGH, PA.

The Forged Iron Mail Box above is a fine fat big fellow capable of holding large envelopes and many of them. The magazine rack is a great convenience too. Length fifteen inches; width six and one-half inches. (No. 12695)
